

Evacuated Tube Solar Hot Water

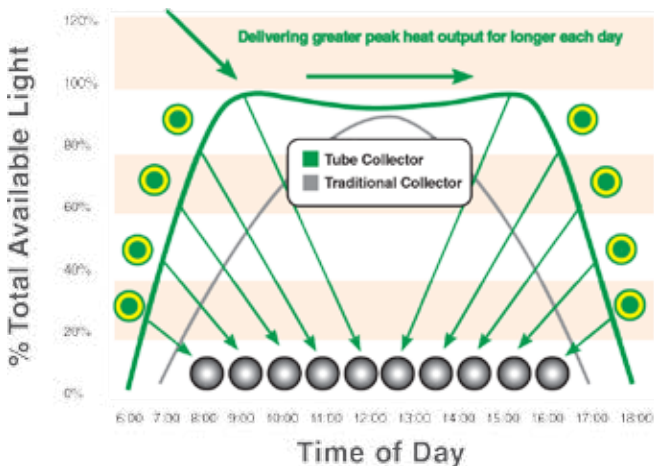

Conventional hot water systems account for up to 31% of the total energy use in the average Australian home. By switching to a Solargain hot water system, you can reduce your water heating bills by up to 80%*.

* NABERS analysis of the IPART paper. (IPART Research Paper 29, November 2007: Residential energy and water use in Sydney, the Blue Mountains and Illawarra. Results from the 2006 household survey: Electricity, Gas and Water).

20,30,40 Tube systems
250L, 315L, 420L storage tanks
Electric boosted solar hot water

Evacuated tubes provide excellent performance during winter and over cast conditions.

iHEAT HOT WATER SYSTEMS CAN PROVIDE UP TO 90% OF YOUR HOT WATER NEEDS, FREE FROM CLEAN NATURAL SUNLIGHT.

Installing a Elect Solar iheat hot water system reduces the average family's carbon footprint by up to four tonnes of CO2 per year - the equivalent environmental benefit of planting 200 trees or removing 1 standard car off the road.

Which system size suits your family

Number of householders	Tank Capacity (litres)	Number of Tubes	Collector Dimensions HxWxD (mm)	Tank dimensions HxW (mm)
1-3	250	20	1978x1608x110	1388x648
3-6	315	30	1978x2388x110	1682x648
6-8	400	40	1978x3300x110	1731x738

Evacuated Tube Range:

- Lightweight
- Excellent cold weather performance
- Frost protected without glycol
- Passive sun tracking
- Self cleaning design
- Aesthetically pleasing low-profile design
